

FAASTeam presents:

Weather ADM and VFR Cross Country Flight Planning Workshop 1

Attendees will use the weather products listed in the Private Pilot Practical Test Standards (PTS) in conjunction with a VFR cross country flight planning scenario. After synthesizing the weather information, attendees will plan a scenario-based cross country. This is a workshop style WINGS event. Attendees will work individually or in small groups. Ground and Flight Instructors will be on hand to assist the attendees in developing or refreshing their planning skills and ADM.

Pilot experience levels from student pilots with initial cross country planning knowledge through experienced commercial or ATP pilots looking to dust off their VFR skills are welcome to attend. VFR sectional charts will be available and all weather products and POH information will be provided. Attendees are asked to bring plotters and E6-Bs, or comparable flight planning tools. The event duration is 0900-1200.

Directions: Enter ERAU at Haas Blvd. off of Willow Creek Road. Follow Haas Blvd. to parking lot A, B, C, or D. From the parking lots, walk southeast towards Bldg. 74, the Academic Complex (three story building). Room 104 is on the first floor of the building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
